

# Nobody Likes Waiting For Their Bill, Particularly When You're In A Hurry!

The back and forth dance **between diner and waiter.**

I MUST GET THE BILL FROM THE TILL!

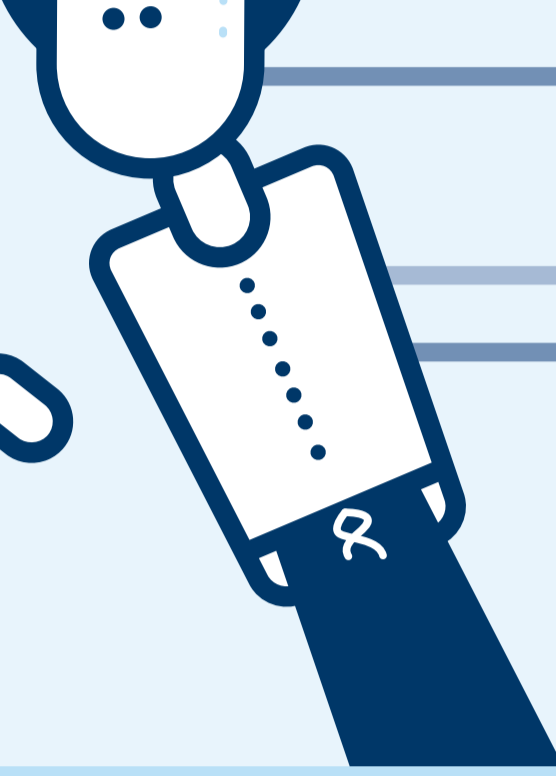

Your waiter tends **multiple tables!**

EXCUSE ME, I'M READY TO PAY?

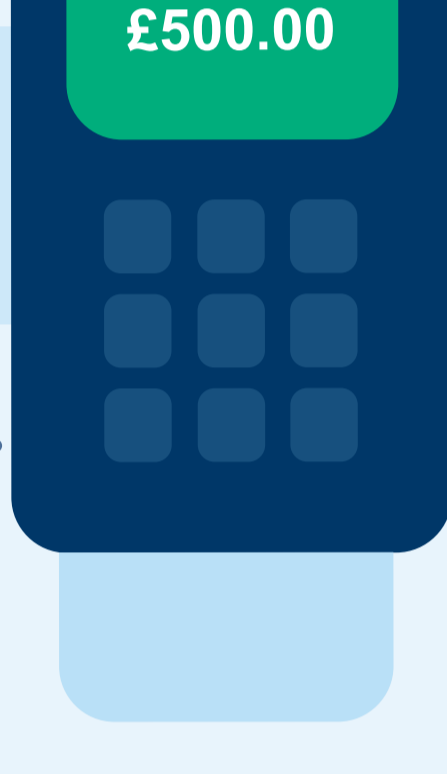

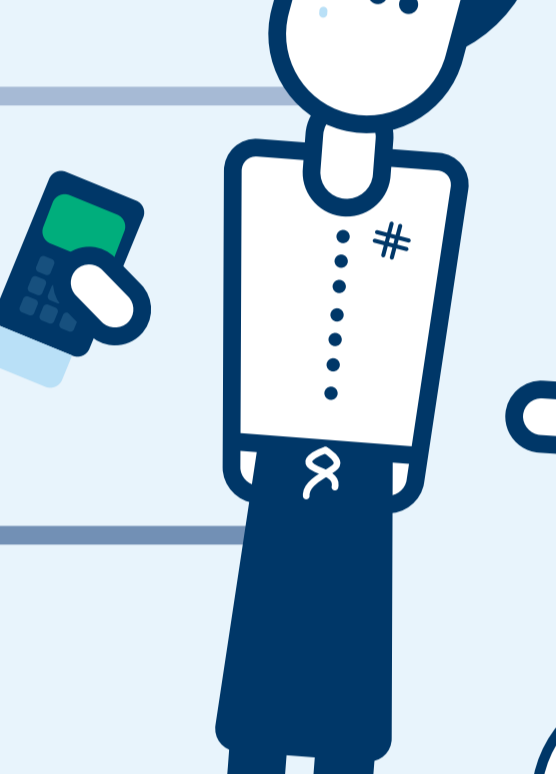

I'M RUNNING AROUND, I CAN'T KEEP UP!

You get their **attention!**

Your waiter **arrives again,** the amount is keyed into the card terminal...

Meaning there could be **errors?**

and **eventually payment is made.**

## But What If...

you could arm your waiting staff with **portable terminals that talk to your till**

## So What Can They Do?

Portable terminals link to your till which reduce miss-keying. It can produce a bill on demand, split it if needed, take payment, and provide a receipt.

**All without the waiter leaving the table.**

## What could that mean for your business?

- ✓ **Better service** for your customers
- ✓ **More time** for your waiting staff
- ✓ **Faster turning** of tables
- ✓ **More covers**

Global PAY Now is the **award winning\*** card processing service for the hospitality industry, and does just that for you.
