It's an easy decision

Train staff in 15 minutes:

Its intuitive software is easy to get to grips with and even easier to set up.

Fully scalable solution:

As your business grows, the system grows with you.

Easy installation:

Plug everything in when the box arrives and migrate data over from your current system.

Trade remotely:

Simply plug in and start taking payments anywhere, anytime.

Stay in control of your business:

The Web Based Office gives you access to real-time data, so you have all the information you need to help make your business a success.

Reduce queues in-store:

Enhance your customers' experience and build brand loyalty.

Free next day delivery upon order completion:

On all available in stock items ordered Monday - Thursday before 7pm.

Use software customers use:

Solve any connectivity issues and provide a smooth service for customers.

How Global Payments EPOS can benefit your business

Payments & Ordering

Split Bills

More than one customer on the table? *Split the bill.* Easily split the total bill equally or identify individual items at the touch of a button.

Partial Payments

Some customers have cash, others have cards. Take partial payments to the total bill value.

Repeat Orders

Make popular items available as repeat orders. Quickly select and add them to the customer's table.

Barcode Scanning

Create barcodes for your products, or scan branded items. Programme your EPOS for a faster checkout.

Named Bar Tabs

Create and store a bar tab with the customers name.

End-of-the-day Reconciliation

Keep track of your days takings with a simple end-of-the-day reconciliation.

Stay in complete control with Web Back Office (W-BO)

W-BO is a real time cloud-based reporting system that allows you to manage your business from any internet enabled device. It can help you with in depth data and analytics and can be customised to your business needs during set-up and can be modified as your business evolves.

It's an intuitive platform that gives you real-time data so you can easily track sales, staff performance and much more, from wherever you are in the world.

Easy to use

Table Management

Take the guesswork out of serving. Create a visual map of your restaurant or bar floor to speed up delivery of customer orders.

One Touch End-of-the-day Reporting

Print a snapshot of the days trading, reset the system and get ready to start a new day - at the touch of a button.

Auto Pop-ups

Quickly identify upsell opportunities, drinks mixers or cooking options by programmed pop-ups/alerts.

Remote Ticket Printing

Send and print an order to the bar or kitchen from the main EPOS unit.

Card Integration With Park Feature

Prevent human error by automatically sending the order total to the card device. If the customer isn't ready to pay, simply park the order and recall later.

5 Price Levels

Set up to 5 price levels per product - perfect for eat-in, take away and happy hour pricing.

Touchscreen

A user-friendly touchscreen helps you process orders faster.

Security & Technology

Prevent Costly Data Breaches

Keep your vital data protected and secure at all times. The Global Payments EPOS is fully compliant with Payment Card Industry (PCI) point of sale industry transaction security standards.

API Connectivity

Ability to pull transactional data, customer records, product details and store information from Web Back Office via an API connection.
